CAREER OBJECTIVE

I'm a front-end developer with more than 3 years experience in this industry. I am very passionate and enthusiastic in creating attractive and easy-to-use user interfaces. I have experience in several frameworks such as React, Next.js, and Vue.js. I enjoy working in a team and usually engage in collaborative projects with other designers and developers. I believe that effective collaboration is essential to create a quality product. Apart from that, I also frequently participate in local developer communities and attend technology events and meetups to broaden my knowledge and network. I believe that as a frontend developer, I have a responsibility to create great user experiences and maintain clean and structured code.
